Team Pod View

Peace in a Pod

The Syneo Line Team Pod View provides a peaceful environment for phone calls, video conferences, interviews, private meetings as well as a dedicated team working space, where two to four people can collectively focus on any allotted task, removing themselves from normal office distractions.

Don't worry though, users will still be able to hear the important ring of an alarm from inside the pod.

The Knowledge

Kelvin (K) relates to the colour temperature of light, while Lux (lx) measures luminance, indicating the brightness.

An airflow gap is essential for maintaining a comfortable and healthy environment within the acoustic pod, helping to dissipate any heat generated within the pod and ensures that air circulation is sufficient for occupants.

Power into this pod will come through the side wall, this is another reason a 50mm airflow gap is essential.
