Peace in a Booth

The Syneo Soft Team Booth is an open-fronted booth, with a distinctive and functional louvre ceiling design, suitable for up to 4 people. This semi-private space can be used for multiple purposes from impromptu meetings to informal breakout.

Don't worry though, users will still be able to hear the important ring of an alarm from inside the booth.

The Knowledge

Kelvin (K) relates to the colour temperature of light, while Lux (lx) measures luminance, indicating the brightness.

An airflow gap is essential for maintaining a comfortable and healthy environment within the acoustic booth, helping to dissipate any heat generated within the booth and ensures that air circulation is sufficient for occupants.

Power into this booth will come through the back wall, this is another reason a 50mm airflow gap is essential.
